

Technology-Assisted Review from HaystackID

An Overview of HaystackID's Technology-Assisted Review Support of a Second Request

As a leader in specialized eDiscovery services, HaystackID has extensive experience in designing and deploying Technology-Assisted Review (TAR) solutions that combine best-of-breed technologies, proven automated review protocols, and expert reviewers to achieve expeditious, efficient, and economically favorable results. One example of this demonstrated executional excellence in the delivery of TAR solutions is exemplified in the support of a **time-sensitive Department of Justice (DOJ) Second Request for one of the top five law firms (AM Law) in the United States.**

A Time-Sensitive Second Request

A top five AM Law firm needed immediate assistance to address a requirement driven by a DOJ Second Request to consider almost five million documents and produce the appropriate documents in the earliest possible time as part of an end-to-end discovery project. The complete project required processing, review, and production of information from a hosted repository of 4.7 million records.

Key HaystackID capabilities requested for this project and supported with ReviewRight included:

- *Forensics FirstSM Services* to help **FIND** the appropriate documents.
- *Early Case InsightSM Services* to help **LISTEN** (understand) applicable documents.
- *ReviewRight[®] Services* to help **LEARN** about and select the correct documents for production.

Upon agreement of services required, HaystackID (ReviewRight) immediately coordinated with the law firm to verify corporate client data disposition, confirm agreement on suggested automated review protocols, and to lock down on production timelines. Leveraging HaystackID (ReviewRight) unified project management, discovery, and review teams, the project was completed early and within the budget agreed upon prior to project execution.

Details of specific actions of this second request project are provided below:

- 1. Processing:** 4.7 million records processed and hosted in Relativity and prepared for review. *Result: Rapid preparation of documents for further review using best-of-breed technology and expert eDiscovery technicians.*
- 2. Technology-Assisted Review:** 4.7 million records reduced into an initial review set of 329,000 documents. *Result: Reduction through predictive coding of records by 93% and preparation of data for further review using expert reviewers supported by ReviewRight staffing technology and Virtual Document Review remote review technology.*
- 3. Review (Expert Reviewers):** 329,000 documents reviewed remotely by 140 attorneys within 10 days. *Result: Complete review completed four days ahead of project schedule and on budget.*

Synopsis: HaystackID (ReviewRight) met the DOJ Second Request requirements for a top five AM Law firm by reducing an initial data set of 4.7 million records by 93% through predictive coding into a manageable data set of 329,000 documents. The 329,000 remaining documents were expertly reviewed by a targeted team of highly qualified review attorneys who completed the final review in 10 days, four days ahead of project schedule **in full compliance of the Second Request requirements.**
