## nControl<sup>®</sup> Data Intelligence Program

Today, discovery fees are primarily based on data hosted in high value review platforms. The cost to review information continues to present 70% of the total cost of discovery. Industry statistics point to the truth that fewer than 25% of all matters are using advanced analytics. nControl drives down the cost of linear review by placing emphasis where it belongs; on the reduction of data moving into the manual review funnel. AI and Advanced Analytics applications are applied upon ingestion using intelligent tools, we use best practice to reduce data volume on the front.
