nVision[®] Discovery Management Program

An Overview of HaystackID's Enterprise Managed Solutions nVision Program

HAYSTACK

nVision®

nVision turns discovery into a predictable business process. One monthly subscription-based fee includes a variety or mix of services such as:

- Processing, ECA, Hosting and Productions
- User Support
- Project Management
- Analytics
- Dashboard
- Program Management
- Reporting

nVision solves the problem of the unpredictable cost of discovery in the legal process, and instead creates a steady monthly cost that is able to be budgeted by internal legal ops groups and offers a defensible and demonstrable savings over market volatility, while reducing risk and implementing controls necessary to retain knowledge based legal data assets.

HaystackID turns discovery into a predictable business process with nVision.

With no upfront cost for hardware or software. We will work with your legal team to identify your discovery needs and will create a discovery management program that works best for your company. We give you access to a Relativity environment that's preconfigured and ready for use, with access to the additional application you desire such as Brainspace, and Nuix. The client can control user groups, workspaces, coding forms, review batches and security or we can do it for them. Each subscription is customized, and costs are tiered based on the client's unique needs.
