Considering Relativity®

A Concise Guide to the Differences Between RelativityOne and HaystackID® Relativity Server Offerings

HAYSTACK®

Get the Optimal Relativity Deployment with HaystackID

Organizations have unique needs when selecting the right eDiscovery software platform. HaystackID offers acclaimed expertise with both RelativityOne and Relativity Server to provide customers the ideal solution.

RelativityOne is Relativity's robust SaaS eDiscovery platform delivered via the Microsoft Azure cloud. It enables seamless, secure collaboration across matters, workspaces, and instances. RelativityOne receives ongoing enhancements and the latest AI innovations.

For those needing a private cloud eDiscovery platform, HaystackID provides hosted Relativity Server through its own secure data centers. This gives customers the core benefits of Relativity Server without managing infrastructure.

With deep experience across Relativity products, HaystackID can help organizations determine the ideal Relativity deployment for their specific requirements, providing an in-depth explanation of the differences between the offerings and how they impact eDiscovery.

The RelativityOne Advantage

Key Attributes of RelativityOne include:

- **Security and Compliance** - RelativityOne has achieved ISO, SOC 2 Type II, HIPAA, and FedRAMP compliance certifications. Data is encrypted in transit and at rest. A 24/7 security team monitors the platform.
- **Speed and Scalability** - On average, RelativityOne offers 0.19-second document-to-document speeds and can handle projects of any size with elastic scalability.
- **Automation** - Workflows for data collection, processing, redaction, and production can be automated to save time. New capabilities are continuously rolled out.
- **Global Availability** - RelativityOne is available in 17 global regions on Microsoft Azure. Users can access workspaces from anywhere.
- **Ease of Use** - Intuitive interface, in-app guided tutorials, and AI-assisted review make RelativityOne user-friendly.
- **Analytics and AI** - RelativityOne will enable advanced AI like unified search, visualization, sentiment analysis, and translation powered by cloud architecture.
- **Ecosystem Collaboration** - A single identity allows access across RelativityOne workspaces and instances to facilitate enterprise and ecosystem collaboration.

Relativity Server is the private cloud version of Relativity with a long track record of proven security and performance. HaystackID hosts Relativity Server in its own secure data centers to provide the benefits of Relativity Server in a hosted environment.

HaystackID's Relativity Server: Redefining eDiscovery Excellence

HaystackID's Relativity Server stands out as a powerful eDiscovery platform that not only streamlines electronic data management, analysis, and review for investigations and litigation but also offers unique attributes. These include speed, scale, customization, control, expertise, and security, which empower legal professionals to manage and master eDiscovery complexities with unparalleled efficiency and precision.

Key Attributes of HaystackID Relativity Server include:

Speed: Our Relativity Server accelerates eDiscovery, providing fast and secure access to crucial information. Our specialized teams are constantly innovating, so your data is always available when needed.

Scalability: Our infrastructure can handle any case, whether large or complex. Our scalable buildout ensures you can manage large data volumes without sacrificing performance or reliability.

Customization: We prioritize meticulous control over product releases, rigorously testing each feature to ensure it aligns with your needs. You can customize your solution to the nuances of your data landscape.

Control: Our automation capabilities extend beyond the Relativity platform, encompassing the entire data lifecycle. This enables you to manage your data with increased efficacy and reduced risk of error.

Expertise: Our technology solutions and client services are not just backed by experience and knowledge, but by a wealth of it. With a consistent and proven track record, HaystackID has earned the trust of legal professionals who rely on our solutions, making us the go-to choice for eDiscovery excellence.

Security: Our commitment to rigorous security standards, including ISO 27001, SOC II Type 2, HiTrust, HIPAA, and more, is bolstered by a dedicated security team that ensures the integrity of your data at every turn.

Choose HaystackID's Relativity Server and partner with a company committed to redefining eDiscovery excellence. Experience the HaystackID advantage and elevate your eDiscovery journey to new heights.

Comparing RelativityOne and HaystackID Relativity Server

While RelativityOne and HaystackID Relativity Server share the same core modules (Collections, Processing, and Review) there are some key platform differences.

RelativityOne		HaystackID Relativity Server
Trusted and unparalleled innovation in SaaS security .	<i>Security Innovation</i>	Innovations in security provided through HaystackID's custom development and security teams.
Cloud-enabled scale, speed, and monitoring.	<i>Ability to Scale</i>	An already proven infrastructure buildout, with the ability to scale .
Rapid innovation and continuous improvements .	<i>Implementation Control</i>	More control over releases to ensure proper testing and proven feature set.
Out-of-the-box automation across the platform.	<i>Precision Automation</i>	HaystackID has already proven automation , not only with Relativity, but with the entire data lifecycle.
Cohesive and consistent global experience .	<i>Platform Experience</i>	Consistent and proven experience with HaystackID's technology and client service professionals.
SaaS guardrails for compliance and privacy in global data centers.	<i>Security Expertise</i>	ISO 27001, SOC II Type 2 with five trust criteria, HiTrust, HIPAA and other security certifications and a dedicated security team.

When to Choose RelativityOne or Relativity Server

Here are some factors to consider when deciding between RelativityOne and Relativity Server:

- **Existing RelativityOne Licenses** - Organizations that have made commitments to Relativity and RelativityOne that are currently underutilized may prefer HaystackID RelativityOne.
- **Highly Sensitive Data** - Some organizations in government or highly regulated industries may prefer private cloud Relativity Server due to data sensitivity.
- **Tight Budgets** - Relativity Server has lower upfront costs compared to a SaaS subscription model.
- **Customization** - Customizations may be easier with Relativity Server.
- **Cloud Benefits** - Organizations wanting elastic scale, global access, ease of use, automated updates, and new innovations may prefer RelativityOne.
- **Managed Security** - Organizations that want assistance managing security may find RelativityOne beneficial.
- **Relativity Server** clients with significant infrastructure demands looking to scale back capital expenditure and right source expertise may prefer HaystackID RelativityOne.

In summary, RelativityOne offers major benefits from the cloud, while Relativity Server provides a private cloud alternative. Factors like data sensitivity, budgets, infrastructure, and desired features can inform the choice between the two. Both platforms offer robust options for eDiscovery teams to efficiently tackle investigations and litigation.
