HaystackID Service and Advisory Portfolio

HaystackID serves clients by delivering customized Global Advisory, Discovery Intelligence, HaystackID Core, Managed Review, and Discovery services.

HaystackID Global Advisory features specialized industry experts and teams organized into practices and optimized to help you purposely plan, assess, report, and manage complex and critical tasks, projects, and programs. Global Advisory supports business-critical and risk-significant requirements and opportunities by providing dedicated practices in cyber discovery and incident response, privacy and compliance, information governance (enterprise risk management), and enterprise-managed solutions.

| Cyber Discovery and Incident Response	Privacy and Compliance	Information Governance	Enterprise Managed Solutions

HaystackID Discovery Intelligence transforms how cybersecurity, information governance, and eDiscovery professionals consider the practice and process of discovering electronically stored information. By synergistically harnessing the potential of artificial intelligence, the precision of data science, the power of machine learning, and the practicality of expertly trained and managed reviewers, to deliver insight and intelligence in support of cybersecurity, information governance, and legal discovery audits, investigations, and litigation.
| Potential	Precision	Power	Practicality

HaystackID Core, a discovery management platform for discovery intelligence, is a robust suite of software, platform, and infrastructure services combining HaystackID Discovery Intelligence with best-of-breed technology, security, and privacy platforms, processes, and protocols to deliver complete eDiscovery capabilities without upfront or additional investments in hardware, software, and support personnel.
HaystackID Core Standard
(SaaS, PaaS)

HaystackID Core Plus

HaystackID maintains the highest levels of security to protect the confidentiality, availability, and integrity of client data. We do this through a three-fold information security approach that includes physical security, network security, and security policy layers. These layers of information security are applied to both internal and external environments and include active and passive protection measures. This approach has also been validated by certifications, attestations, and compliance audits, which include:

ISO 27001 Certified	SOC 3 Certified (Five Trust Services Criteria)	SOC 2 Type 2 Certified (Five Trust Services Criteria)	HITRUST Certified	HIPAA and HIPAA HITECH Act Compliance
General Data Protection Rule (GDPR) Adherence	EU-US and Swiss-US Privacy Shield Certifications	International Traffic in Arms Regulations (ITAR) Compliance	NIST 800-171/ DFARS Compliance	PCI DSS Compliance
