HaystackID® DSAR Response Service

Smarter, Faster, Defensible—Powered by
Core Intelligence AI Case Insight™

HAYSTACK®

Transforming Privacy Compliance Through AI-Augmented Response

Data Subject Access Requests (DSARs) are a top-tier regulatory obligation for organizations subject to the GDPR, UK GDPR, CPRA, and similar privacy frameworks. When initiated by current or former employees, these requests often span vast volumes of unstructured and sensitive data. For legal, compliance, and information governance professionals, traditional workflows are no longer sufficient to respond with confidence, precision, and timeliness.

HaystackID® offers a purpose-built DSAR Response Service integrating legal and regulatory expertise with advanced artificial intelligence. Powered by **Core Intelligence AI Case Insight™**—a generative AI (GenAI) matter intelligence engine—this service enables rapid identification, classification, and redaction of personal data across structured and unstructured data environments. Combined with expert oversight, this approach ensures defensibility, accelerates response times, and minimizes compliance risk.

A Five-Step Framework for DSAR Excellence

The HaystackID workflow follows five structured phases to enable repeatable, defensible results across any data environment.

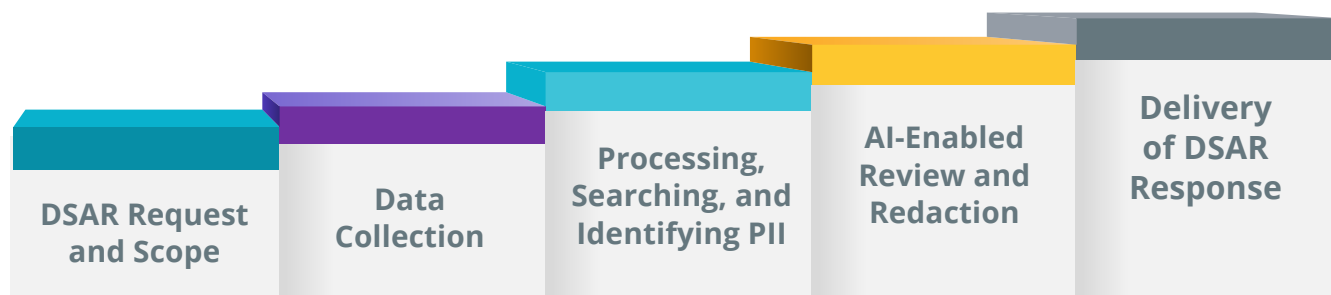

The first phase, **Request and Scope**, defines the regulatory basis and boundaries of each request. Our specialists assess legal obligations and help clients determine the custodians, data types, and jurisdictions involved.

In **Collection**, HaystackID acquires potentially responsive data using forensic-grade tools across messaging platforms, email archives, HR systems, and cloud repositories. Chain of custody is maintained throughout.

Processing, Search, and PII Identification is where **Case Insight** plays a critical role. This HaystackID engine applies advanced GenAI to conduct contextual classification and topic-based analysis, surfacing PII and PHI with speed and accuracy—dramatically reducing review scope and manual lift.

In **Review and Redaction**, **Core Intelligence AI™** enhances review by automatically identifying and flagging sensitive information for redaction. Our legal review teams apply expert validation to ensure that redactions are complete and in line with jurisdictional requirements.

Finally, **Delivery** compiles all validated and redacted content into a production-ready response package that is compliant with jurisdiction-specific formatting and securely delivered within regulatory timelines.

Organizations are facing mounting pressure to respond to DSARs with speed and precision—but legacy workflows can't keep up. With Core Intelligence AI and Case Insight, we've introduced a modern approach that integrates investigative AI with legal intelligence to deliver faster, more defensible results.

—Esther Birnbaum, Executive Vice President of Legal Data Intelligence, HaystackID

Strategic Value for Privacy-First Organizations

This service does more than accelerate fulfillment. It transforms DSAR compliance from an operational burden into a scalable, strategic advantage. With Core Intelligence AI and HaystackID's proprietary Case Insight engine, organizations can reduce fulfillment costs, standardize privacy workflows, and respond to regulatory scrutiny with confidence.

Availability and Deployment

HaystackID's DSAR Response Service is globally available and designed for flexible deployment. Whether handling a single high-risk request or a continuous volume of employee or consumer inquiries, our service supports:

- **Rapid AI-enhanced fulfillment** for global privacy laws.
- **Project-based engagements** for internal, regulatory, or legal review needs.
- **Deployment options** built to align with infrastructure, data residency, and operational constraints.
- **24/7 real-time support** from experienced DSAR and privacy professionals.

This operational model enables organizations to meet strict response deadlines while maintaining legal defensibility and stakeholder transparency.

Technology-Enabled. Expert-Led.

The DSAR Response Service combines the power of Core Intelligence AI with HaystackID's Case Insight engine to accelerate analysis and review. These capabilities are seamlessly integrated into review platforms and supported by HaystackID's Global Managed Review services, and built on the foundation of industry-leading security, privacy, and compliance protocols.

Privacy and Confidence, Delivered

For organizations balancing regulatory complexity, operational limits, and reputational risk, HaystackID's DSAR Response Service delivers a trusted, end-to-end solution. Enabled by intelligent technology and informed by real-world legal review expertise, this service empowers teams to meet privacy compliance demands—on time, at scale, and with confidence.

DSARs are not just operational exercises—they are legal representations subject to scrutiny. Our approach is designed from the ground up to align with global data protection laws, minimize risk, and ensure transparency for data subjects.

—Christopher Wall, Data Protection Officer, HaystackID
