

PARTNER PROFILE

HaystackID® and Verint: Comprehensive Multimedia eDiscovery Solutions

Enhancing Legal Review and Compliance Through AI-Driven
Multimedia Processing and Secure Data Management

HAYSTACK®

Partner Overview

The partnership between **HaystackID**® and **Verint** delivers advanced multimedia processing, transcription, and review capabilities. This collaboration offers a powerful, AI-enhanced solution for handling complex data challenges related to audio and video files in legal, compliance, regulatory, and cyber events. Together, these technologies streamline workflows, increase accuracy, reduce costs, and ensure data security throughout the eDiscovery process.

Why This Partnership Matters

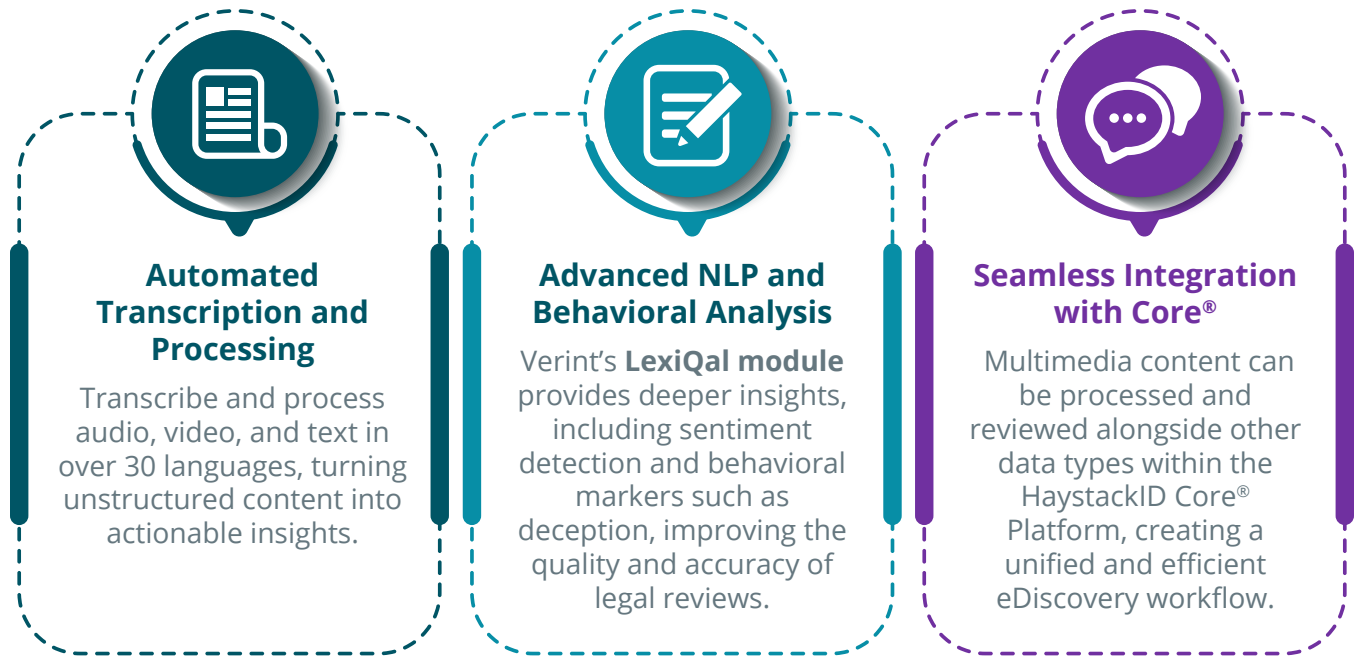

With the increasing use of multimedia data in legal and regulatory cases, traditional eDiscovery workflows face significant challenges. The partnership between HaystackID and Verint addresses these challenges by integrating advanced AI, speech processing, and natural language processing (NLP) tools into a scalable, secure platform. This solution enables organizations to handle large volumes of multimedia data with speed and precision, reducing review time and ensuring compliance with data protection regulations.

Verint's solution operates entirely within HaystackID's secure infrastructure, ensuring client data remains within our environment throughout the entire processing lifecycle. Integrated directly with Relativity, this in-house solution enables its Client Services teams to efficiently and cost-effectively process client audio and video data, providing a seamless and secure multimedia review experience without data ever leaving our infrastructure.

The Verint Solution from HaystackID®

AI-Driven Multimedia Processing and Review

The combined solution offers comprehensive capabilities for handling multimedia data:

Key Benefits of the Solution

Efficiency and Time Savings

- **Accelerated Review:** Automatic transcription, speaker separation, and sub-second navigation allow for faster and more focused reviews of large multimedia datasets.
- **Precise Media Management:** Quickly identify and remove corrupt or unplayable media files, reducing unnecessary hosting costs and minimizing the time spent on non-relevant content.

Enhanced Accuracy and Deeper Insights

- **Accurate Media Durations:** Provide precise, sub-second media durations to ensure accurate analysis and reporting.

Cost Reduction

- **Optimized Data Management:** Efficiently remove unplayable media to avoid excessive storage costs and reduce environmental impact with GPU-accelerated processing.
- **Scalable and Flexible Deployment:** Available in cloud (RelativityOne) and on-premises (Relativity Server) environments, ensuring the solution can handle projects of any size.

Target Solution Use Cases

This combined solution is ideal for legal teams involved in:

- **Corporate Investigations:** Analyze recorded meetings or calls quickly and efficiently using AI-powered tools to uncover key insights.
- **Litigation Support:** Streamline the review and production of critical audio and video evidence, enhancing accuracy and efficiency.
- **Regulatory Compliance:** Ensure compliance with privacy and data protection regulations, especially in handling sensitive multimedia files.
- **Fraud Detection and Behavioral Analysis:** Detect fraud markers and sentiment changes using advanced AI tools, providing deeper intelligence in legal investigations.

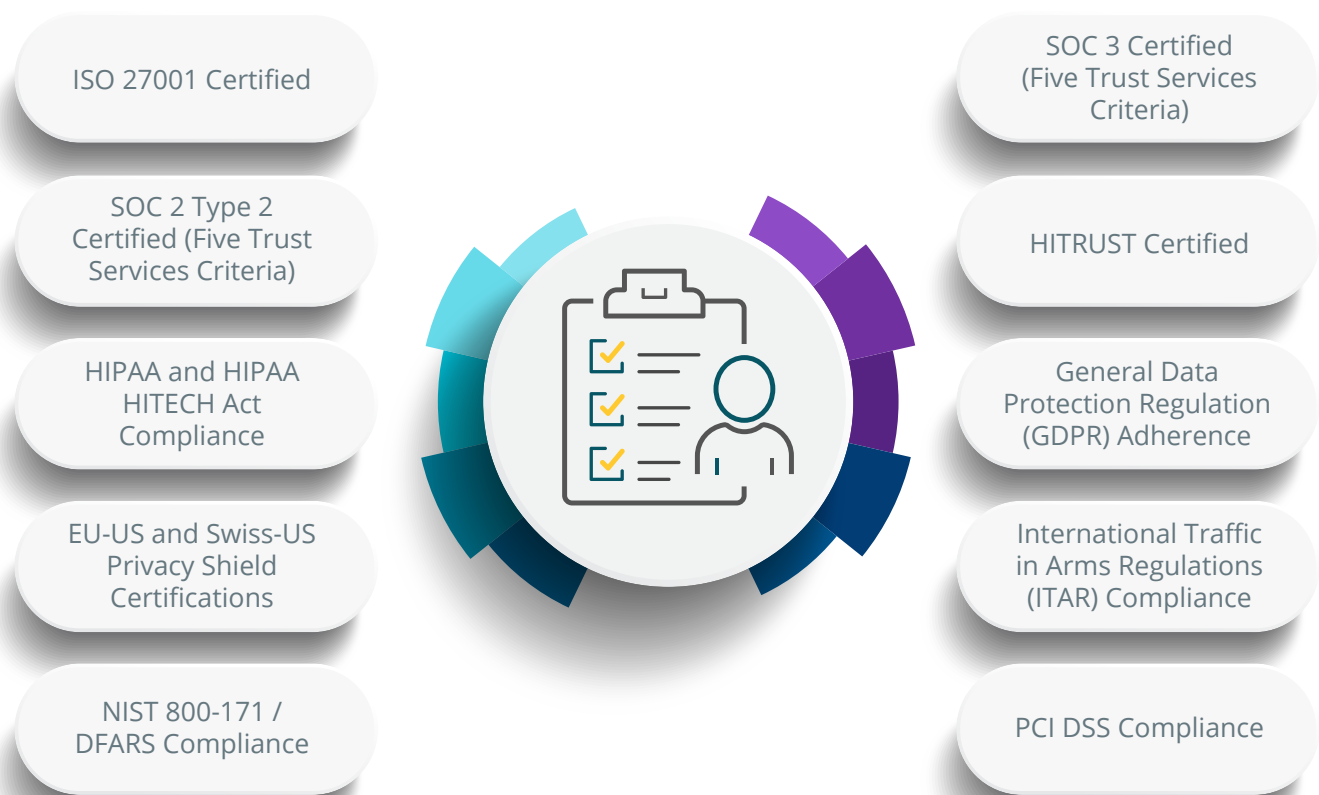

Considering Security and Compliance

HaystackID Security Profile

HaystackID is dedicated to protecting customer data through a comprehensive, three-layered approach that covers **physical**, **network**, and **security policies**. These layers are applied across internal and external environments to safeguard the confidentiality, availability, and integrity of customer data.

This security approach has been validated through industry-leading certifications, attestations, and audits, ensuring that customers can focus on their eDiscovery processes without concern for data security.

Certifications, attestations, and compliance audits include:

Verint Security Features

Verint complements HaystackID's security profile with its robust encryption and compliance capabilities, which are designed for privacy-sensitive industries. It provides secure multimedia data processing, ensuring it complies with key regulatory frameworks such as GDPR and CCPA while offering automatic redaction of sensitive payment card information (PCI).

Together, HaystackID and Verint provide an end-to-end secure and compliant solution that safeguards sensitive information throughout the entire eDiscovery process.
