

Subpoena Intelligence™ for Complex Construction Data

A Faster, Cost-Effective, Defensible Subpoena Response Strategy

Case Insight™, the HaystackID Matter Intelligence Engine, delivers **early data understanding, relevance classification, and an actionable matter narrative in hours, not weeks.** Using text extracted from collected data sources, attorneys can quickly focus on communications and documents related to the subpoena without undertaking a costly review of the entire population.

CORE CAPABILITIES

Document Type Categorization	Relevance Classification	Privilege and Sensitive Data Detection
Timeline Analysis	Key People and Documents	Cross-Project Segregation
Document Ranking and Prioritization	Gap Analysis	Actionable Matter Narrative

EXPECTED OUTCOMES

- **Faster time to first facts:** Accelerates legal response and timeline development from weeks to hours.
- **Reduced review costs:** Isolates non-relevant data upstream, reducing review and hosting expense.
- **Defensible subpoena response:** Audit-ready workflows aligned with SOC 2 and ISO 27001 controls.

POWERED BY

Case Insight™, Powered by eDiscovery AI™, categorizes, classifies, ranks, and analyzes data at scale to identify and prioritize project-specific information **before full-scale review begins.**

MEASURED IMPACT

70–85% Potential Review Reduction

90% Faster Time to First Facts

~70% Average Cost Savings

24 hrs Time to Initial Insight

Results vary by matter scope, data composition, review protocol, and validation methodology.

WHEN TO ENGAGE

- **Construction Disputes and Investigations:** Drawings, RFIs, submittals, schedules, contracts, and communications across multiple systems.
- **Government or Regulatory Subpoenas:** When broad collection is required, but reviewing everything is not.
- **Multi-Project Investigations:** Shared personnel, reused templates, and email threads spanning projects and issues.
- **Large-Scale Data Collections:** Large email collections, file shares, M365, BIM, and project management platforms requiring defensible reduction and prioritization.
